## CONTACTS

**+370 (684) 14 429**
**dangiskazukauskas@gmail.com**

## SKILLS

- JavaScript
- React
- HTML/CSS
- C#
- .NET

## LANGUAGES

Lithuanian - Native
English – C1/C2

## HOBBIES

- Sport is a big part of life since childhood
- Psychology
- Chess

# Dangis Kažukauskas

Hello! I recently graduated from Kaunas University of Technology, where I primarily focused on Backend technologies. However, I've also been delving into full-stack development more extensively in recent times, building upon my previous knowledge in the field :)

## Education

**Software Engineering** | 2019 - 2023
Kaunas University of Technology

## Experience

**Maths Tutor** | 2023 08 – now
Company „COREPETITUS"
Responsibilities:

- Teach students of various ages mathematics;
- Prepare students for tests and exams.

**C# Intern** | 2023 02 – 2023 05
Company „EPAM Systems"
Skills learned:

- .NET ecosystem and C# programming language basics;
- how to work with arrays and text;
- how to implement search algorithms for large amounts of data.

**Courier** | 2019 11 – 2020 07
Company „Mamma Pizza"
Skills learned:

- to plan my time, as I was working and studying at the same time;
- work alone and with a team;
- be flexible - when there were no orders, I worked outside of my specialty - I helped the kitchen staff prepare food.

The following is an informal experience. Since I only had to do an internship in the field I wanted (IT), I helped my dad in the summers by doing physical work at his job.

I dedicated the summer of 2022 to learning - I went through a number of so-called "crash courses" related to Frontend technologies, such as HTML/CSS, React, JavaScript, and I also went through "The Modern Javascript Bootcamp Course" on the Udemy platform, after which I received a certificate visible on LinkedIn in the account.
